USN 2JP23CI032

BCS403

Fourth Semester B.E./B.Tech. Degree Examination, June/July 2025 Database Management Systems

Time: 3 hrs.

Max. Marks: 100

Note: 1. Answer any FIVE full questions, choosing ONE full question from each module.
2. M: Marks, L: Bloom's level, C: Course outcomes.

		Module – 1	M	L	C
Q.1	a.	Explain the types of attributes with example.	4	L2	CO1
	b.	Define database. Explain the main characteristics of the database approach.	8	L2	CO1
	c.	Show the ER diagram for an EMPLOYEE database by assuming your own entities (minimum 4) attributes and relationships, mention cardinality ratios wherever appropriate.	8	L3	CO2
		OR			
Q.2	a.	Describe the three schema architecture.	4	L2	CO1
	b.	Explain the component models of DBMS and their interaction with the help of diagram.	8	L2	CO1
	c.	Design ER diagram for a university database by assuming your own entities (4). Mention primary key, constraints and relationships.	8	L3	CO2
		Module – 2			
Q.3	a.	Explain relational model constraints.	6	L2	CO1
ı	b.	Explain the characteristics of relations with suitable example for each.	6	L2	CO1
Q.4	c.	Considering the following schema: Sailors (sid, sname, rating, age) Boats (bid, bname, color) Reserves (sid, bid, day) Write a relational algebra queries for the following: i) Find the names of sailors, who have reserved red and a green boat. ii) Find the names of sailors who have reserved a red boat. iii) Find the names of sailors who have reserved a red or green boat. iv) Find the names of sailors who have reserved all boats. OR Explain the steps to convert the basic ER model to relational Database schema.	6	L3	CO1
					CO1
	b.	Explain Unary relational operations with example.	6	L2	(())

			-	1	//5
				11/	\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\
	c.	Consider the relation schema Employee database. EMPLOYEE (Fname, Minit, Lname, SSn, Bdates, Address, Sex, Salary Super_SSn, Dno) DEPARTMENT (Dname, Dnumber, Mgr_SSn, Mgr_start_date) PROJECT (Pname, PNumber, Plocation, Dnum) WORKS_ON (Essn, Pno, Hours) DEPENDENT (Essn, Dependent_name, sex, Bdate, Relationship) Write relational algebra queries for the following: i) Retrieve the name and address of all employees who work for the 'Research' department. ii) List the names of all employees with 2 or more dependents. iii) Find the names of employees who work on all the projects controlled by department number 5. iv) List the names of employees who have no dependents.	8	L	*
		Module – 3			
Q.5	a.	What is the need for normalization? Explain second and third normal form with examples.	6	L2	CO4
	b.	Outline constraints in SQL.	6	L2	CO1
	c.	Identify the given Relation R(ABCDE) and its instance, check whether FDS given hold or not. Give reasons. i) $A \rightarrow B$ ii) $B \rightarrow C$ iii) $D \rightarrow E$ iv) $CD \rightarrow E$. $ \begin{array}{c ccccccccccccccccccccccccccccccccccc$	8	L3	CO4
Q.6	a.	What is Multivalued dependency? Explain 4NF and 5NF with suitable	6	L2	CO4
		example.		1.2	/
	b.	Outline the informal design guidelines for relational schema.	6	L2	CO4
	c.	Consider relation R with following function dependency: EMPPROJ (SSn, Pnumber, Hours, Ename, Pname, Plocation) SSN, Pnumber → Hours, SSN → Ename Pnumber → Pname, Plocation. Is it 2NF? Verify? If no give reason.	8	L3	CO4

/1	a.	Consider the following Module – 4			D	CS
	ч.	Consider the following schema for a company database: Employee (FName, LName, SSn, Addors, G				
1		Employee (FName, LName, SSn, Adderss, Sex, Salary, Dno, Department (Dno)				
/		Super Co. The Adderse Cay C. I.		10	L3	3
		Department (Dname, Dnumber, mgr_SSn, mgr_st_date) WORKS on (Formula of the state)				
		Project (Dname, Dnumber, mar, og				
		Phame, Phumber, Di, mgr SSn, mgr st date)				
		Project (Pname, Dnumber, mgr_SSn, mgr_st_date) WORKS_on (Essn, Pno, Hours) DEPENDENT (Essn, D				
		DEFENDENT ' 'YOUR'				
		Write the So. (Essn., Dependent nome of				
		DEPENDENT (Essn, Pno, Hours) Write the SQL queries for the following: i) List the names of management of the square of management of the square of the squa				
		i) List the names of managers who have atleast one dependent (use ii) Retrieve the name of and				
		correlated posts in managers who have atleast one d				
		ii) Retrieve 41.				
		nettieve the name of each employer				
		Retrieve the name of each employee who has a dependent with the iii) For each project retrieve the project number.				
		For each project ratio is the same sex as the employee				
		number of				
		For each project retrieve the project number, project name and the iv) Retrieve the SSN of all employees who work on that project.				
		Netrieve the SSN of all employee				
		or 3. (Use 1N)				
		v) Find the sum of the vivial in the vivial in the sum of the vivial in the sum of the vivial in the vivial interview. The vivial in the vivial				
		department as well as maximum salary, minimum salary, average salary in this department.				
		salary in this department salary, minimum salary, average				
	b.	Why concurrency court is				
		Why concurrency control is needed? Demonstrate with an example.				
		an example.	1	0 1	L2	\overline{CO}
0		NO.				
			1	- 1		
8	a.	Consider the following school To				
8	a.	Consider the following sobot 1. The	1/		2	
.8	a.	scheduled and prefixed with the	1() [.3 (CO
8	а.	scheduled and prefixed with the transaction name. S1: T1: R(X) T2: R(X) T1: W(X) T3: R(X) T3	10) [.3 (CO
8	а.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y)	10		.3	CO
8	а.	scheduled and prefixed with the transaction name. $S1:T1:R(X)$, $T2:R(X)$, $T1:W(Y)$, $T2:W(Y)$, $T1:R(Y)$, $T2:R(Y)$. For each schedule answer the follows:	1() [23 (CO
8	a.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph fourth.	10) [.3	CO
8	a.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph fourth.	1() I	23	CO
8	a.	scheduled and prefixed with the transaction name. 8	a.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serial schedules?	1() I	23	CO
8	a. **	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules?	1(DI	23	CO
8	a.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict, serializable?	1(DI	.3	CO
8	a.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules?	1(DI	23 (CO
8	b.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules?	10		23 (CO
		scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules?	9			
		scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform Supervisor" whenever an arms of the schedules are supervisor.	10	L3		
		scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform Supervisor" whenever an arms of the schedules are supervisor.	9			
		scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules?	9			
	b.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform_Supervisor" whenever an employees salary is greater than the salary of his or her direct supervisor in the COMPANY database. Module 5	9			
		scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform_Supervisor" whenever an employees salary is greater than the salary of his or her direct supervisor in the COMPANY database. Module - 5 Describe the two - phase locking protocol for consurrence and the view equivalent.	10	L3	CC	05
	b.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform_Supervisor" whenever an employees salary is greater than the salary of his or her direct supervisor in the COMPANY database. Module - 5 Describe the two - phase locking protocol for consurrence and the view equivalent.	10			05
	b.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform_Supervisor" whenever an employees salary is greater than the salary of his or her direct supervisor in the COMPANY database. Module 5	10	L3	CC	05
	b. a.	Consider the following schedule. The actions are listed in the order they are scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform_Supervisor" whenever an employees salary is greater than the salary of his or her direct supervisor in the COMPANY database. Module - 5 Describe the two - phase locking protocol for concurrency control provide example to illustrate how it ensures serializability in transaction schedule.	10	L3	COS	05
	b.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform_Supervisor" whenever an employees salary is greater than the salary of his or her direct supervisor in the COMPANY database. Module - 5 Describe the two - phase locking protocol for consurrence and the view equivalent.	10	L3	CC	05
	b. a.	consider the following schedule. The actions are listed in the order they are scheduled and prefixed with the transaction name. S1:T1:R(X), T2:R(X)T1:W(Y), T2:W(Y), T1:R(Y), T2:R(Y) S2:T3:W(X), T1:R(X), T1:W(Y), T2:R(Z), T2:W(Z), T3:R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform_Supervisor" whenever an employees salary is greater than the salary of his or her direct supervisor in the COMPANY database. Module - 5 Describe the two - phase locking protocol for concurrency control provide example to illustrate how it ensures serializability in transaction schedule. Explain the characteristics of NOSQL system.	10	L3	COS	05
.9	b. a. b.	scheduled and prefixed with the transaction name. S1:T1:R(X), T2:R(X) T1:W(Y), T2:W(Y), T1:R(Y), T2:R(Y) S2:T3:W(X), T1:R(X), T1:W(Y), T2:R(Z), T2:W(Z), T3:R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform_Supervisor" whenever an employees salary is greater than the salary of his or her direct supervisor in the COMPANY database. Module - 5 Describe the two - phase locking protocol for concurrency control provide example to illustrate how it ensures serializability in transaction schedule. Explain the characteristics of NOSQL system.	10	L3	CO5	05
.9	b. a. b.	scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform_Supervisor" whenever an employees salary is greater than the salary of his or her direct supervisor in the COMPANY database. Module - 5 Describe the two - phase locking protocol for concurrency control provide example to illustrate how it ensures serializability in transaction schedule. Explain the characteristics of NOSQL system.	10	L3	COS	05
.9	b. a. b.	consider the following schedule. The actions are listed in the order they are scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform_Supervisor" whenever an employees salary is greater than the salary of his or her direct supervisor in the COMPANY database. Module - 5 Describe the two - phase locking protocol for concurrency control provide example to illustrate how it ensures serializability in transaction schedule. Explain the characteristics of NOSQL system.	10 10 10 L2	L2 C2 C	CO5	05
.9	b. a. b.	consider the following schedule. The actions are listed in the order they are scheduled and prefixed with the transaction name. S1: T1: R(X), T2: R(X) T1: W(Y), T2: W(Y), T1: R(Y), T2: R(Y) S2: T3: W(X), T1: R(X), T1: W(Y), T2: R(Z), T2: W(Z), T3: R(Z) For each schedule answer the following: i) What is the precedence graph for the schedule? ii) Is the schedule conflict_serializable? If so what are all the conflicts equivalent serial schedules? iii) Is the schedule view serializable? If so what are all the view equivalent serial schedules? Explain triggers with example write a trigger in SQL to call a procedure "Inform_Supervisor" whenever an employees salary is greater than the salary of his or her direct supervisor in the COMPANY database. Module - 5 Describe the two - phase locking protocol for concurrency control provide example to illustrate how it ensures serializability in transaction schedule. Explain the characteristics of NOSQL system.	10	L2 C2 C	CO5
